Karl Erik Toom

Frontend Developer

Hardworking and enthusiastic Front-end developer who is eager and ready to step his foot into the industry. I have spent a lot of time researching and dabbling in different industries to find my passion and as soon as I tried coding and web development in particular, I fell in love with it. Ever since then, I've started to learn and develop my Front-end skills while working part-time as a customer consultant and I am ready to step my foot into the industry to develop my skills in a work environment.
